Subject: Release of Stop Shipment on 26482 Style Commercial and Series I (KPT and KPSE) Connectors

Dear Valued ITT Cannon Value Added Distributor:

On July 11, 2017, ITT Cannon sent out a notification of stop shipment of all MIL-DTL-26482 and 26482 style commercial (KPT and KPSE) connectors due to a quality issue with our molded grommets.

Please note that effective today, we have lifted our stop shipment of commercial product, as the quality issues have been resolved. Nevertheless, please be advised that our recall on grommet inventory is still in place. Finally, you are reminded that, due to the removal of our products from the DLA QPL, we are still on stop shipment for all mil-spec marked product.

Please work with your local ITT Cannon customer service representative to receive the most updated delivery information on open and replacement orders.

Feel free to contact me with any additional questions regarding this issue.

Sincerely,

Nicki Kreger
